SUBJECT INDEX

Adsorption 245
Africa
  Ashanti, Ghana 15, 279
  Congo Basin 1
Ag, in soil over mineralised breccia 431
Aitik Cu mine, northern Sweden 583
Al
  in crude oil 65
  in groundwater 353
  in soil over mineralised breccia 431
Alum Park, San Jose, California, U.S.A. 83
Amazon Basin, Brazil 1
Analytical method
  CH_4 323
  Pb isotopes 627
  trace elements 323
Aquitain Basin, France 609
Arizona, U.S.A. 353, 431, 597
As
  in Au mine tailings 279
  in contaminated groundwater 569
  in crude oil 65
  in FeOOH 279
  in Fe oxides 279
  in fly ash 403
  in smelter flue dust 337
  in soil 15, 279
  in soil over mineralised breccia 431
  speciation in soil 15
Ashanti Au mine, Ghana 15, 279
Arsenopyrite, oxidation of 15
Au
  in mosses 235
  in shoshonitic lamprophyres 197
  in stream sediment 235
Australia, Western 197
Axe River, Avon, England, U.K. 689

Ba
  in lamprophyres 197
  in mineralisation host rocks 455
  in soil over mineralised breccia 431
Bacteria, Fe oxidising 583
Balazuc-1 well, Southeast Basin, France 657
Baltic Sea 379
Barite nucleation in brines 561
Bavaria, Germany 413
Book Review
  Applied Mossbauer Spectrometry. Theory and Practice for Geochemists and Archaeologists 733
Electrochemical Methods in Soil and Water Research 478
Geochemistry of Clay-Pore Fluid Interactions 352
Natural Zeolites 351
Regional Geochemistry: Lake District and Adjacent Areas 478
Regolith Exploration Geochemistry in Arctic and Temperate Terrains, HEG Volume 5. 477

Br
  in crude oils 65
  in saline waters 297
Brazil
  Amazon Basin 1
  Minais Gerais, 701

C
  in Amazon River Basin 1
  in Congo River Basin 1
^{13}C
  in carbonate minerals 609
  in volcanic gases 371
Ca
  in groundwater 175, 356, 419
  in porewater 175
  in pore fluids during diagenesis 501
  in soil 119
  in soil over mineralised breccia 431
  in vegetation 119
California, U.S.A. 387
Canada, 637
  Ontario 245
  Quebec 457
Cap Enragé deposit, Quebec, Canada 455
Cd
  in mine tailings 677
  in smelter flue dust 337
  in soil 677
  in stream water 677
  in stream sediment 677
  in vegetation 677
Ce
  behaviour during lateritic weathering 701
  in bauxite 701
  in syenite 701
CH_4
  in atmosphere 141
  in gas field 141
  in rice paddies 141
CH_3HS, in hide piles 569
Chiribaya Site, Peru 627

Cl
in crude oil 65
in groundwater 353
in saline waters 297
in thermal waters 147
Clay membrane
efficiency 533
permeability 533
Co
in crude oil 65
in groundwater 356
CO_2
cold gas discharge 287
flux in Amazon Basin 1
flux in Congo Basin 1
in lamprophyres 197
in reaction fluids during diagenesis 501
in soil gas 53
in geothermal 287
in volcanic gases 147, 371
release during thermal recovery of oil 523
Colorado, U.S.A. 223, 271, 491
Colorado River, California, U.S.A. 387
Congo River Basin, Africa 1
Cr
in crude oil 65
in contaminated groundwater 569
Crude oil, geochemistry 65
Cu
flue dust, stability 337
in groundwater 353, 569
in lake sediment 597
in lake water 597
in mine tailings 677
in mine waste drainage 583
in pore waters of lake sediment 597
in smelter flue dust 337
in soil 677
in stream sediment 677
in stream water 353, 677
in vegetation 677
Culling erroneous analyses of formation waters 637

Diagenesis
experimental studies 501
behaviour of U during 547
Dimethylarsinic acid 15, 279, 569
Dogger aquifer, Paris Basin, France 297
Don River, Ontario, Canada 245
Drilling fluids, chemistry 657
Dy
behaviour during lateritic weathering 701
in bauxite 701
in syenite 701

Earthquakes
California 85
related hydrologic changes 85
Engineering geochemistry 553
England
London Basin, U.K. 161, 175
Cornwall 677
Environmental geotechnology 553
Er
behaviour during lateritic weathering 701
in bauxite 701
in syenite 701
Eu
behaviour during lateritic weathering 701
in bauxite 701
in crude oil 65
in syenite 701

F, in lamprophyres 197
Fe
in crude oil 65
in groundwater 175, 353, 569
in lake sediment 597
in pore water 161
in pore waters of lake sediment 597
in smelter flue dust 337
leaching from nuclear glass 255
redox cycling, waters 23, 569
Fe oxidising bacteria, in Cu mine waste 583
$Fe(OH)_3$
in sea water 379
sorption of As and trace metals by 569
FeOOH
dissolution 23
reactivity 23
Fe oxides
Pb in 45
sorption of trace metals 245
FeS, solubility in sea water 379
Floodplain sediments, geochemistry 689
Fly ash, leach of As and Se 403
Fluid inclusions, in Zn deposit 609
Formation waters
analyses 637
saline 297
Fowey River, Cornwall, England, U.K. 689
France
Aquitain Basin 609
Balazuc-1 well, Southeast Basin 657
Paris Basin 297
Saint-Salvy ore deposit, Montagne Noir 609

Ga, in soil over mineralised breccia 431
Gd
behaviour during lateritic weathering 701
in bauxite 701
in syenite 701
Geochemical exploration
for mineralised breccia pipes 431
using overbank sediments 689
using soil gas 53

Geochemical modelling
of contaminants in aquifer 353
of diagenetic reactions 501
of groundwater-mineral interaction 419
of mass transfer 657
of Mo dissolution from coal waste 37
of water-rock interaction in Cu mine waste 583
Geological environment, interaction with human activity 553
Germany, Bavaria 413
Ghana, Ashanti Au mine 15, 279
Glensaugh, Grampian Highlands, Scotland, U.K. 119
Globe, Arizona, U.S.A. 353
Goethite, sorption of As 279
Great Plain, Hungary 419
Ground permeability, influence on Rn in homes 647
Groundwater
artificial recharge 161, 175
contamination 353, 569
quality 161, 175
geochemical modelling 419
Gypsum nucleation in brines 561

^{2}H
in fluid inclusions 609
in thermal waters 147
in saline waters 297

^{3}H
in groundwater 387
in irrigation drain water 387
in river water 387
in soil pore water 387
Hayward fault, California, U.S.A. 83
He
in soil gas 53
$^{3}He/^{4}He$ ratios in volcanic gases 371
Heavy metals
partitioning in stream sediments 45
Hematite
sorption of As 279, 403
sorption of Se 403
Hg
in panned concentrate 235
in stream sediment 235
in stream water 235
in well water 235
pollution from Au mining 235
High level nuclear waste 713
H_2S, in hide piles 569
Humic acids, effects on nuclear glass 255
Hungary, Great Plain 419
Hydrogeochemistry 1, 161, 175, 271, 387, 419
of acid mine drainage 353
of alkaline lake 597
of formation waters 637
of saline groundwaters 297
of thermal fluids 147
of contaminated groundwaters 73, 569

Imperial Valley, California, U.S.A. 387
Inductively coupled plasma mass spectrometer (ICP-MS)
trace element analysis of volcanic glass 323
Pb isotope determination 627
Inhibitors of Ca and Ba sulphate nucleation 561
Interstitial fluids, chemistry 657
Italy
north Latium 287
Pantelleria 147
Isotopes
C 371, 609
H 147, 297, 609
^{3}H 387
He 371
N
in fertilizer 73
in well water 73
O 147, 197, 297, 609
Pb 455, 627
S 609
Sr 413
U 271, 479, 547

Japan, 141
Kusatsu-Shirane Volcano 371
Tono U deposit 479
Nakamaruke district 547

K
in groundwater 175, 353
in lamprophyres 197
in pore fluid 161, 175
in soil 119
in soil over mineralised breccia 431
in vegetation 119
Kerogen, breakdown 93
King Water, Cumbria, England, U.K. 689
Kusatsu-Shirane Volcano, Japan 371

La
behaviour during lateritic weathering 701
in bauxite 701
in crude oil 65
in soil over mineralised breccia 431
in syenite 701
Lamprophyres, geochemistry 197
Laser ablation inductively coupled plasma mass spectrometry 323
Lateritic weathering 701
Lepidocrocite, sorption of As 279

Li, in groundwater 175
London Basin, England, U.K. 161, 175
Lox Yeo River, Somerset, England, U.K. 689
Lu
behaviour during lateritic weathering 701
in bauxite 701
in syenite 701

Manifold River, Staffordshire, England, U.K. 689
Massachusetts, U.S.A. 569
Mexico, Peña Blanca District, Chihuahua 713
Mg
in groundwater 356, 419
in pore water 161, 175
in pore waters during diagenesis 501
in soil 119
in soil over mineralised breccia 431
in vegetation 119
Mineralisation
Au 197
in breccia pipes, 431
Pb/Ba 455
U 479, 713
Zn with Ge 609
Mining, acid drainage 353
Mn
in crude oil 65
in groundwater 353
in lake sediment 597
in pore water 597
Mn oxides
Pb in 45
sorption of trace metals 245
Mo
aqueous dissolution from soil 37
in coal mine spoil 37
in crude oil 65
in soil 37
in soil over mineralised breccia 431
Monomethylarsonic acid 15, 279, 569

N_2, in soil gas 53
^{15}N
in fertilizer 73
in well water 73
Na
in groundwater 353, 419
in soil 119
in thermal waters 147
in vegetation 119
Nakamaruke district, central Japan 547
Nd
behaviour during lateritic weathering 701
in bauxite 701
in soil over mineralised breccia 431
in syenite 701
Nebraska, U.S.A. 73, 271, 627
Nene River, Cambridgeshire, England, U.K. 689
Nevada, U.S.A. 713
New Zealand, Taranaki Basin 65
NH_3 in contaminated groundwater 569
Ni
in crude oil 65
in groundwater 356
in soil over mineralised breccia 431
NO_3^- contamination of well water 73
North Carolina, U.S.A. 235
North Latium, central Italy 287
Nopal I U deposit, Peña Blanca District, Chihuahua, Mexico 713
Nuclear glass, aqueous corrosion 255

O_2, in soil gas 53
^{18}O
in fluid inclusions 609
in lamprophyres 197
in saline waters 297
in thermal waters 147
Oakland, California, U.S.A. 83
Oil, thermal recovery from oil sands 523
Ontario, Canada 245
Organic acids, corrosion of nuclear glass 255
Organic matter, sorption of trace metals 245

P
cycling 311
in atoll ecosystem 311
Pacific Islands, Tuvalu 311
Pacheta Lake, east central Arizona, U.S.A. 597
Paleoheat flow 93
Panhandle, Nebraska, U.S.A. 73
Pantellaria, S. Italy 147
Paris Basin, France 297
Pasa Quatro, Minas Gerais, Brazil 701
Pb
in Fe and Mn oxides 45
in groundwater 569
in bones 627
in overbank sediment 689
in river sediment 45
in mineralisation host rocks 455
in mine tailings 677
in smelter flue dust 337
in soil 627, 677
in soil over mineralised breccia 431
in stream sediment 677
in stream water 677
in vegetation 677
Pb isotopes
in archaeological samples 627
in galena 455
in mineralisation host rocks 455
Pd, in lamprophyres 197
Peru, Chirabaya site 627
Platte River, Nebraska, U.S.A. 271
Poly Secrest site, Moab, Utah, U.S.A. 627

Portlandite, sorption of As and Se 403
Powder River, Wyoming, U.S.A. 37
Pyrite, oxidation 161, 175
Pyrolysis, Rock-Eval S2 Data 93

Quebec, Canada 455

Radioactive waste, analogue 479, 713
Rare earth elements
    behaviour during lateritic weathering 701
    in bauxite 701
    in syenite 701
Rb, in lamprophyres 197
Rn, in homes 647

S
    deposition on soils 127
    in lamprophyres 197
S^{2-}, in contaminated groundwater 569
^{34}S, in sulphide minerals 609
Saint-Salvy ore deposit, NW Montagne Noir, southern France 609
Sb, in crude oil 65
Sc
    in crude oil 65
    in soil over mineralised breccia 431
Scania, Sweden 647
Scotland, U.K. 119, 127
Se, in fly ash 403
Severn River, mid Wales, U.K. 689
Si, leaching from nuclear glass 255
Simulated hydrocarbon generation 93
Simulated thermal recovery of oil from oil sands 523
Silicate-carbonate reactions during diagenesis 501
Silicate-carbonate reactions during thermal recovery of oil 523
Shale permeability 533
Sm
    behaviour during lateritic weathering 701
    in bauxite 701
    in syenite 701
Snowshoe Mountain, Colorado, U.S.A. 223, 491
Spent nuclear fuel, alteration products 713
Sphalerite, in stream sediments 45
SO_4
    in groundwater 175, 353
    in porewater 175
    in soil 127
Soil acidification 127
Soil gas 53
Sourhope, Borders Region, Scotland, U.K. 119
Sr
    in lamprophyres 197
    $^{87}Sr/^{86}Sr$ ratios in bone 413
        in teeth 413
Swale River, North Yorkshire, England, U.K. 689
Sweden
    Aitik Cu mine 583
    Scania 647

Tephrochronology 323
Th
    in mineralisation host rocks 455
    in soil over mineralised breccia 431
Thermal fluids, geochemistry 147
Tono U deposit, Japan 479
Tonwantonga village site, Homer, Nebraska, U.S.A. 627
Tuvalu islands, Pacific 311
Tyne Basin, Northern England, U.K. 689

U
    exploration 431
    in bedrock 647
    in river water 271
    in groundwater 271
    in mineralisation host rocks 455
    in sedimentary rocks 547
    in soil over mineralised breccia 431
    redistribution during diagenesis 547
$^{234}U/^{238}U$ disequilibrium as an indicator of U redistribution 547
U isotopes, in river waters 271
U-series nuclide migration 479
United Kingdom
    England 161, 175, 677, 689
    mid Wales 45, 677, 689
    Scotland 119, 127
Uraninite, alteration to secondary uranyl minerals 713
U.S.A.
    Arizona 353, 431, 597
    California 83, 387
    Colorado 223, 271, 491
    Massachusetts 569
    Nebraska 73, 271, 627
    Nevada, 713
    North Carolina 235
    Utah 627
    Wyoming 37, 271
Utah, U.S.A. 627

V, in crude oil 65
Volcanic glass, chemistry 323

W, in crude oil 65
Wales, mid, U.K. 45, 677, 689
Welded tuff
    aqueous dissolution 223
    porosity characterisation 491
    specific surface area 223
    vapour sorption 491

Wemyss mine, mid Wales, U.K. 677
West Chiverton mine, Cornwall, England, U.K. 677
Western Australia 197
Western Canada sedimentary basin 637
Woburn, Massachusetts, U.S.A. 569
Wulfenite 37
Wyoming, U.S.A. 37, 271

Yb
behaviour in lateritic weathering 701
in bauxite 701
in syenite 701
Yilgarn Block, Western Australia 197
Ystwyth River, mid Wales, U.K. 45
Yucca Mountain, Nevada, U.S.A. 713

Zn
in groundwater 569
in lake sediments 597
in lake water 597
in mine tailings 677
in overbank sediment 689
in river sediment 45
in pore waters of lake sediment 597
in soil 677
in soil over mineralised breccia 431
in stream sediment 677
in stream water 677
in vegetation 677

Zr
in bauxite 701
in syenite 701
leaching from nuclear glass 255
